

General Building Cleaning

The Professional way

Proudly North American.

The art of winning contracts. And keeping them.

Let's get straight to the point. If you really believe that the only way to being competitive and keeping demanding customers happy is through cheaper products and lower cost staff, then you can stop reading here. If, however, you suspect that modern methods, efficient new products and proper support can help you make a difference, we will be more than happy to tell you more.

Rule #1: Cut costs. Not efficiency.

While speed is clearly important, there's a huge difference between cleaning fast and cleaning effectively. But with the right methods, systems and knowledge you can speed up cleaning performance dramatically. By selecting the right cloth for each surface it's possible to cut cleaning time by up to 50% without sacrificing the cleaning result.

Rule #2: Always deliver quality.

Of course you can win contracts based on the lowest price. But in the long run, quality of cleaning is always part of the deal. Modern offices make modern demands, there's no room for streaks, scuff marks or floors drenched in water. A clean, tidy and safe office is a vital part of a company's brand.

Rule #3: Simplicity pays.

Besides maximum efficiency, Vileda Professional – Marino has another straightforward mission: To create user-friendly and easy-to-understand methods and systems. The result: A flying start for new or inexperienced staff and added cost savings.

Rule #4: Work ecologically.

Traditional cleaning methods, using lots of chemicals and water, do not apply to modern environmental thinking, or our way of cleaning. Furthermore we will show you how you can save money by cleaning in an ecologically correct way.

Rule #5: Look and act Professional.

In the old days most offices were cleaned at night. Today, your personnel often work during the day-time and have to blend into many different environments – while always looking positive and Professional. Modern, functional, well-designed products with an attractive, Professional image will help you create the right impression.

Rule #6: Think healthy = healthy thinking.

We innovate, develop and manufacture products for people. We're absolutely convinced that people who feel well and like their tools, perform better. In the end, this can only contribute to better business, less staff absence, less administration and less need for hiring new personnel.

How about turning costs into profit?

Three steps to cost efficient, effective cleaning

Knowing your customer's demands and premises is the key to successful contract cleaning:

- How big is the site?
- Are laundry facilities available or would it pay to invest?
- How long is the contract?
- What are the dirt levels?
- What cleaning standards is your client expecting?

When you've got the full picture, we'll help you to select the right methods and cleaning systems.

Method

Choosing the most appropriate method of cleaning is the first vital step. For example:

- Large sites with access to laundry, we recommend pre-prepared cleaning with Swep and microfiber wipes.
- Small sites with limited access to water, Spray Express and microfiber wiping is the best solution.
- General sites, the UltraSpeed bucket and wringer method is the natural choice.

All in all we cover all your cleaning needs.

System.

For every requirement there's a Vileda Professional – Marino system and by combining different product solutions we can match your needs down to every detail.

Training and Support

Don't misunderstand us – our products are extremely easy to understand and to use. But with the help of our cleaning expertise, plus customized training and continuous support, you'll get the very best out of your investment.

How we can help you make a difference

With over 40 years experience, Vileda Professional – Marino are leading manufacturers and innovators in the cleaning industry. But size alone does not make the difference. It's the people that count. At Vileda Professional – Marino, you meet dedicated Professionals at all levels, from R&D to local sales representatives.

The secret of better cost-in-use

In the end, the price of products is of less importance. It's the overall calculation that matters. By developing new methods and cleaning systems, we ensure you get the most efficient and ergonomic tools for modern office cleaning giving you the very best cost-in-use.

A long-term commitment

Good cleaning makes people feel good. This, basically, is the reason why we strive to develop solutions that make Professional cleaning easier, more effective and less time-consuming.

Once you've experienced the difference it's easy to see the benefits.

Sweep

Sweep is the market leading solution for one-step cleaning. The system includes mops, cloths, frames, handles and accessories for dry, damp and wet cleaning.

Choose from two systems: Sweep Classic and the new Sweep Duo. The latter features double-sided high performance mops allowing you to clean up to double the area with just one mop and can be used in conjunction with a press on the Origo trolley.

UltraSpeed

UltraSpeed is a modular wet mopping system, designed for easy, efficient, time-saving floor cleaning. The light-weight press wrings out over 34% more water than traditional systems.

All components are interchangeable, and buckets can be used separately or mounted on single or double chassis. The ergonomic handle and lightweight break frame, plus microfiber mops complete the system

UltraSpeed Mini

**Small in size.
Big on Performance.**

UltraSpeed Mini is the latest addition to the hugely successful UltraSpeed family. Created specifically to fulfil the requirements of all small area cleaning (107-322 sq ft/ 10-30 m²), UltraSpeed Mini combines the ergonomic, performance and hygiene benefits of the existing UltraSpeed range into a small, compact system.

Traditional Wet Mopping

The Looper is the best choice in traditional mops. Looped end mops offer superior absorbency while eliminating linting, tangling and fraying. Available in cotton, synthetic and a variety of blended fibers including the new MicroEco mop made of post-consumer PET plastic bottles and revolutionary microfiber technology.

Choose from two bucket and wringer systems: Downpress and Sidepress bucket and wringer combinations that range in size from 26 to 40 quart. Both bucket sizes can be fitted with either wringers.

MicroStar contract

MicroStar contract is the economic solution that provides all the required cleaning performance.

Features

- True 100% Microfiber
- Streak free performance
- Pre-prepared and spray bottle method
- Colour coding options (BRYG)
- Tested up to 500 washing cycles
- Minimize chemical use

MicroRoll (Disposable)

MicroRoll is the first disposable cloth to offer 100% Microfiber performance at a throw away price.

MicroRoll can be used as a disposable in hygiene sensitive areas or can be machine washed up to 10 times. MicroRoll has also been independently tested by Microsearch Laboratories who found a 99.9% removal of bacteria* in just one wipe.

* Clostridium Difficile and MRSA

The correct system for you

Vileda Professional – Marino understand that cleaning requirements differ from site to site. This is why we offer comprehensive floor cleaning and wiping systems that we will tailor to match your specific requirements. Below is a quick guide to show you which system would suit your requirements most closely.
