

NanoTech micro

Microfibre and active silver – a golden hygienic result

Certified!
Strong
anti-bacterial
activity

Proudly North American.

The Battle against

Win it with NanoTech micro and Vileda Professional - Marino

Bacteria and germs are obvious threats you might be facing in your field of work. The race against bacteria growth and spreading is getting more and more intense, and today there are ways of overcoming the problems.

The obvious wiping solution for an operation where maximum hygiene is paramount is the all-new NanoTech micro cloth from Vileda Professional – Marino.

Designed with microfibre and developed to keep your business healthy!

Remove and kill bacteria!

Based on an intense research and development process we are proud to introduce a cloth that has one clear goal – to keep your operational environment as hygienic and healthy as possible.

The new NanoTech micro cloth does not only wipe away bacteria, it even kills them in direct contact as nano particles of silver have been embedded in the microfibre filaments.

Silver is the secret

NanoTech micro is a microfibre cloth, but that's not all.

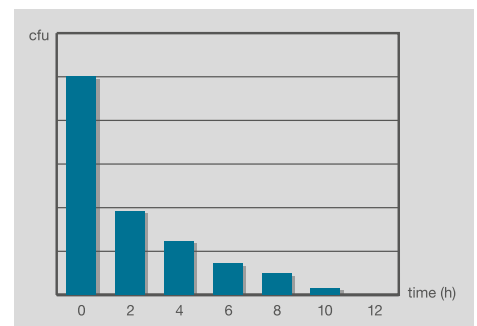

The secret lies in that nano particles of silver have been blended/embedded in the microfibre composition. And when silver-ions get in direct touch with bacteria and germs, they are

killed. All in all it effectively prevents bacterial growth, and the effect does not fade away when cloths are being washed.

Actually silver has been used as an antibacterial agent for more than 3,000 years, and is now common in cosmetics, sportswear and medical products.

Microfibre at its best

Of course NanoTech micro also has all the properties of the patented Freudenberg endless microfibre technology you are used to when wiping with a Vileda Professional cloth – high durability, one-step and streak-free wiping, easy gliding and superior cleaning results.

Proven bacteria reduction

NanoTech micro is able to reduce the amount of bacteria significantly after 1 hour. After 12 hours all bacteria are even extinguished.

ainst Bacteria

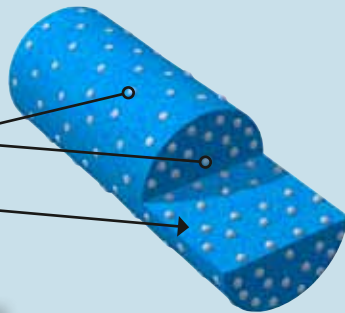

NanoTech micro advantages

- Nano-silver particles are embedded in the endless microfibres (patent pending).
- 99.93% bacteria or germs removal when wiping surfaces. (Certified by BMA).
- No growth of bacteria or germs on cloths for more than 24h.
- Enables you to omit tumble-drying as cloth can be stored in moist condition up to 24 hours without bacteria growth. Saves time and means significant reduction in cleaning start-up time.
- No odour from cloth in use.
- Keeps antibacterial properties also after several hundred washing cycles.
- Colour coded to prevent cross contamination.

Polyester

Antibacterial certification

When having the German certification institute Hohenstein testing NanoTech micro, the product has shown a strong antibacterial activity.

Our complete maximum hygiene offer

Maximum hygiene and lowest possible bacteria growth cannot be achieved by NanoTech micro only. That's why we in our Battle against Bacteria efforts, offer also MicroRoll* semi-disposable cloths and Swep** floor cleaning system – both with proven and certified bacteria removal.

This way you can take care of and beat the bacteria both above floor and on floor!

* bacteria removal certified by Microsearch Laboratories Ltd.

** bacteria removal certified by BMA.

Swep floor cleaning system

One area, one mop – no cross contamination!

Swep is Vileda Professional's renowned floor cleaning system and has been proven superior when it comes to reducing bacteria growth, high efficiency and maximum ergonomics.

This is particularly obvious in hospitals, where it has successfully helped reducing bacteria growth and lowering infection rates.

The concept is as simple as it is effective – mop one patient room, dispose of the dirty mop when leaving the room and apply a pre-prepared and clean one when entering a new patient room. Fast, effective and with no risk for cross contamination.

Vileda Professional – Marino – part of the Freudenberg Group

Vileda Professional – Marino provides innovative cleaning solutions and systems for professional users in various application areas, such as General Building, Healthcare and HoReCa. With sales offices in major markets, and a wide network of representatives, we are located around the world.

Vileda Professional – Marino belong to the Freudenberg Group – a diversified family run global company, headquartered in Germany.
