Breazy – the New Wave in wiping

A semi-disposable cloth with microfiber cleaning performance, Breazy can be used on all surfaces including desktops, cupboards, chairs, counters, bars and all washroom surfaces.

The benefits of a semi-disposable combined with the cleaning performance of a microfiber

If you have ever thought of taking a closer look at a semi-disposable wiping cloth, now is the time. Even at a first glance, the Vileda Breazy stands out with its unique wave-structure.

Now pick it up and enjoy the soft and comfortable feel of it. Use it and see for yourself the microfiber cleaning performance and absorbency. Finally, take a look at the price tag, no wonder it's the new wave in wiping.

Use and dispose – or wash and use again!

Breazy is a cloth for all situations and environments. If hygiene and disposability are your key criteria, its price allows you to use it for a day or so, then throw it away, but Breazy is also machine washable up to 15 times. That's why it's called a semi-disposable.

Outstanding dirt pick-up with unique wave-structure

The microfiber content and unique wave-formed pattern gives Breazy 40% better dirt pick-up capability than comparable conventional cloths. After trapping the dirt in the 'pick-up pockets', rinse, wring and use it again and then dispose of it.

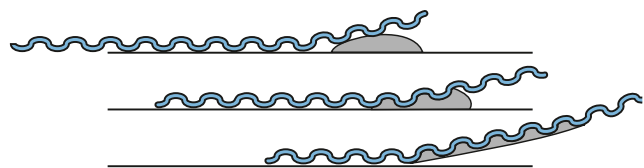

Maximum hygiene

The Vileda Breazy is a natural part of any modern cleaning system. It has been certified by a leading, independent institute of giving a 96.3% reduction of bacteria in just one wipe.* And of course it comes colour-coded, to help prevent cross-contamination.

Value for money

Compared to disposable or semi-disposable alternatives, Vileda Breazy gives excellent value for money. It outperforms every kind of textile rag or disposable paper alternative – and it's more affordable than any state-of-the-art durable cloth. Clever – isn't it?

The pick-up pockets created by the wave-structure capture more dirt than standard cloths.

Quick'n Dry Sponge Cloths and Dispenser

With its convenient dispenser, the highly absorbing Quick'n Dry is especially suited for spill pick-up and wet wiping in professional kitchens.

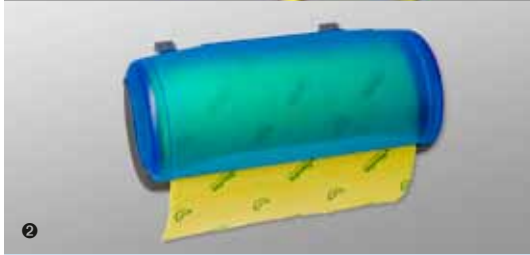

Quick'n Dry is based on the same material as the original Wettex® sponge cloth – 1/3 cotton and 2/3 cellulose. Extra long cotton fibers makes the cloth durable but still flexible and soft. Optimum fibre density and pore size means excellent absorption – up to 15 times its own weight. The dispenser is recommended for wallmounting.

Efficiency. Quick'n Dry saves time due to fast wetting, easy rinsing and wringing and last but not least – extra high absorption capacity.

Convenience. Always ready to use – pull out and cut. Use the cloth once and throw it away, or wash it over and over again at 95°C / 203°F.

Ergonomics. Low friction, high absorption and softness

Environment & hygiene. Compostable and fully biodegradable. Water-based colour and chlorine-free production process.

MicroRoll

Lightweight 100% microfibre wipe offering outstanding lint free cleaning performance with a greater than 99.93% removal of bacteria

With MicroRoll there is no requirement for investment in laundering facilities and staff do not need to change their current cleaning practices. The result is improved cleaning results with no additional workload.

Independent tests carried out by Microsearch Laboratories in the UK have found the following levels of bacteria reduction after just one wipe:

Clostridium Difficile:
Vegetative form – 99.93%

Spore form – 99.94%
MRSA – 99.96%
