

# MicroEco Cut End Mop

Made from PET bottles and microfibre technology

## Application area

MicroEco cut end mop is ideally suited for use in any school, university/college or commercial cleaning environment.

## Product description

MicroEco cut end mop is an economical alternative of our MicroEco looped mops and is a great value at a modest price.

MicroEco's unique 4 ply yarn construction combines strength and durability for general purpose cleaning.

It is manufactured from a combination of post consumer recycled material, microfibre yarn and green PET synthetic fibres derived from plastic bottles.

The cut end mop is sewn with a high quality durable mesh able to withstand harsh chemicals.

## Customer benefits

### • Eco-Friendly

Go green...naturally, with Marino's new MicroEco cut end mop made of post-consumer PET plastic bottles and revolutionary microfibre technology. Our MicroEco cut end mop is just another step in helping preserve our natural resources as it prevents thousands of bottles from becoming landfill waste. Together, we can all commit in doing our part to protect the environment.

### • Advantages

The unique engineered yarn of our MicroEco mop makes it highly resistant to chemicals and disinfectants thereby prolong the life compared to traditional mops. The microfibre yarn absorbs water quicker resulting in faster drying times and more efficient cleaning. Effective for all floor surfaces. It's minimal linting properties allows

MicroEco greater pick-up of dirt particles. Cut end end construction is an economical alternative.

## Instructions for use.

1. Always rinse and wring out mops after every use.
2. Cut end mops should always be stored by hanging the mop head in a warm, dry and well ventilated area.
3. Avoid scrubbing with the top portion of the mop head as this will tear the strands and shorten the life of the mop.
4. When mopping rough surfaces, always mop in the direction that minimizes snagging.
