

Breazy

A semi-disposable cloth with microfiber cleaning performance

Breazy can be used on all surfaces including desktops, cupboards, chairs, counters, bars and all washroom surfaces.

The benefits of a semi-disposable combined with the cleaning performance of a microfiber

If you have ever thought of taking a closer look at a semi-disposable wiping cloth, now is the time. Even at a first glance, the Vileda Breazy stands out with its unique wave-structure.

Now pick it up and enjoy the soft and comfortable feel of it. Use it and see for yourself the microfiber cleaning performance and absorbency. Finally, take a look at the price tag, no wonder it's the new wave in wiping.

Use and dispose – or wash and use again!

Breazy is a cloth for all situations and environments. If hygiene and disposability are your key criteria, its price allows you to use it for a day or so, then throw it away, but Breazy is also machine washable up to 15 times. That's why it's called a semi-disposable.

Outstanding dirt pick-up with unique wave-structure

The microfiber content and unique wave-formed pattern gives Breazy 40% better dirt pick-up capability than comparable conventional cloths. After trapping the dirt in the 'pick-up pockets', rinse, wring and use it again and then dispose of it.

Maximum hygiene

The Vileda Breazy is a natural part of any modern cleaning system. It has been certified by a leading, independent institute of giving a 96.3% reduction of bacteria in just one wipe.* And of course it comes colour-coded, to help prevent cross-contamination.

Value for money

Compared to disposable or semi-disposable alternatives, Vileda Breazy gives excellent value for money. It outperforms every kind of textile rag or disposable paper alternative – and it's more affordable than any state-of-the-art durable cloth. Clever – isn't it?

The pick-up pockets created by the wave-structure capture more dirt than standard cloths.
